“Ranking Incidence in Ecology: a Brief Overview and Invitation”

Dr. David Jenkins
Department of Biology
University of Central Florida
Orlando, FL 32816

Abstract:

Ecologists analyze the presence and absence of species among sites by several approaches, but have not used relative incidence to compare species. The purpose of this talk is to summarize the context for analyzing relative incidence in ecology, consider potential approaches to explore its use and value, and to invite collaboration on this work.

DATE: **November 9, 2007**

TIME: **12:30pm – 1:30pm**

PLACE: **Math and Physics Building, Room 233**
